

Mitul Jagad

Senior FullStack Developer

jagadmitul@gmail.com • 7383348315 • LinkedIn • GitHub

Profile

Seasoned Full Stack Developer with 5+ years of experience specializing in **JavaScript, ReactJS, NextJS, NodeJS, Python, and micro-services, cloud infrastructure**. Proven expertise in building scalable, modular, and high-performance web applications. Experienced in implementing MFE solutions using **Module Federation, Single-SPA**, and modern tools to enable flexible, independent deployments. Adept at translating business requirements into efficient, technical solutions, optimizing performance, and **leading cross-functional teams to deliver complex projects**. Passionate about enhancing UI/UX, streamlining development workflows, and fostering collaboration within distributed teams.

Professional Experience

Team Lead, OmnisAI

2024 Oct – 2026 Feb | Remote, USA

- Spearheaded development of scalable web applications, utilizing Micro Frontend architecture to enhance modularity and reduce code duplication
- Led cross-functional teams in agile environments, driving collaboration and delivering high-impact projects on time.
- Managed and mentored junior developers, providing technical guidance, code reviews, and fostering skill development.

Senior FullStack Developer, Rebrandic

2023 Jun – 2025 May | Remote

- Oversee secure, scalable system architecture for diverse projects, ensuring data security and compliance.
- Optimize application security with best practices in authentication and encryption.
- Implement robust DevOps processes.

Software Developer, Technical Pots (TPots)

2022 Jun – 2023 Nov | Surat, India

- Develop high-performance web and mobile applications using ReactJS, NodeJS, and React Native.
- Lead API integration and build serverless applications with NextJS, PostgreSQL, and AWS Lambda.
- Create custom WordPress gutenber blocks to enhance site functionality.

FullStack Developer, Zodiac Techlance

2020 Feb – 2022 Aug | Remote

- Develop scalable full-stack solutions integrating smart contracts and AI tools for enhanced automation.
- Design secure, scalable architectures, ensuring compliance with data security standards.
- Implement security best practices, focusing on authentication, encryption, and secure APIs.

Skills

Web Development – HTML, CSS, JS, ReactJS, NextJS, NodeJS, Frontity, Bootstrap, Tailwind, MaterialUI, PHP, Wordpress, Bedrock, VueJS, NuxtJS | **Database** – SQL, PostgreSQL, MySQL, MongoDB |

App Development – React Native, Android | **State Management** – Redux, Redux-Toolkit |

Deployment – CI/CD, AWS, Docker, Serverless | **Web3** – Blockchain, Solidity, DApps, Contracts |

Rest API | **Git Version Control** | **Soft Skills** – Presentation, Project Management

Projects

MedChron.AI

- AI-powered healthcare platform for automatic symptom generation and patient profiling.
- AI analyzes user input to identify symptoms, medical history, and more.
- Automates patient data management and offers actionable insights for healthcare professionals.

Centralized Authentication

- Single Sign-On (SSO) for access to all 8 integrated products.
- Advanced security features: Social sign-on, passkeys, 2FA, magic links.
- Efficient session & cookie management for seamless cross-product experience.
- Roles and permissions for granular access control.
- Billing & subscription management for easy plan handling.
- Organization management: Manage multiple organizations and users under each.

TAPUZ e-commerce delivery service

- Addressed and resolved 90+ tickets for Israel's largest shipping e-commerce platform (NuxtJS frontend, NestJS backend).
- Optimized SQL queries, reducing execution time from 50+ seconds to under 8 seconds.
- Deployed updates to live servers using PM2 for continuous availability.
- Supported the React Native mobile app for driver operations.

Collective Shift

- Developed custom Gutenberg blocks in React for a fully customized WordPress site.
- Extended WordPress query loops to introduce new functionalities.
- Managed project through Docker in WSL, gaining valuable experience with client-centric customizations.
- Integrated PostgreSQL database and developed AWS Lambda functions using Sequelize ORM.
- Deployed the project using Bitbucket pipelines and Serverless framework for continuous integration (CI) and deployment to an S3 bucket.

Bhawsar Chemicals Dashboard

- Built a highly efficient dashboard using ReactJS and Tailwind CSS.
- Integrated APIs for seamless CRUD operations and generated detailed reports.
- Used Redux-Toolkit for optimal state management.

Portfolio

Overseas Advisor

- Led the development of a ReactJS-based platform with Redux for state management, facilitating a user-friendly experience.
- Integrated PHP APIs and MySQL database for seamless backend operations.
- Built a PHP-based admin dashboard for efficient site management.
- Enabled features like college bookmarking and consultant connections via forums, using MaterialUI, CSS, and Bootstrap.

Railway Database Management System

- Developed a comprehensive Railway Database Management System to efficiently manage train schedules, passenger data, and ticket sales.
- Utilized MySQL for database design and management, handling large data volumes.
- Enhanced my skills in database architecture and administration through this personal project.
